PROFESSIONAL SUMMARY

Final-year B.Tech Artificial Intelligence and Data Science student graduating in 2027, with hands-on experience building web applications using React.js, Node.js, Express.js, and MongoDB. Familiar with REST APIs, Java, Spring Boot, and Git/GitHub, along with project experience in Generative AI and RAG-based applications. Looking to apply my technical skills as an entry-level Full Stack Developer and gain experience building practical, user-focused web applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Frontend:** HTML5, CSS3, React.js
- **Backend:** Node.js, Express.js, Java, Spring Boot
- **Databases:** MongoDB, SQL
- **API Development:** REST APIs, JSON, API Integration
- **Tools & Platforms:** Git, GitHub, VS Code
- **AI Technologies:** Generative AI, RAG, LLM Integration, Vector Storage

INTERNSHIP EXPERIENCE

Web Development Intern **June 2025**
Aalan TechSoft, Salem *25 Days*

- Gained hands-on exposure to web development using HTML, CSS, and JavaScript.
- Practiced full-stack development fundamentals and explored the MERN stack, including React.js, Node.js, Express.js, and MongoDB.

PROJECTS

SpekNova – AI-Powered Communication Platform

- Developing an AI-powered platform focused on improving communication and speaking practice through an interactive user experience.
- Focused on modern frontend development, responsive UI, and AI-powered functionality.

Cognivis – Retrieval-Augmented Generation (RAG) Application

- Developing a RAG-based AI application designed to retrieve relevant information and generate context-aware responses.
- Exploring document retrieval, embeddings, vector storage, and LLM integration to support knowledge-grounded responses.

StayMate AI – Student Accommodation & Roommate Discovery Platform

- Building a student accommodation platform designed to help students discover suitable housing and potential roommates.
- **Technology Stack:** React.js, Java, Spring Boot.

NarratoVision – Generative AI Application

- Developed an application that transforms text prompts into visual scenes and identifies emotional tone using NLP techniques.
- Integrated OpenRouter API and Stable Diffusion for AI-powered content generation.
- **Technology Stack:** Python, Streamlit, OpenRouter API, Stable Diffusion.

EDUCATION

B.Tech – Artificial Intelligence and Data Science
Dr. NGP Institute of Technology, Coimbatore
Expected Graduation: 2027

Higher Secondary Certificate (Class 12)
Sengunthar Matric Higher Secondary School, Tharamangalam
Year of Completion: 2023

CERTIFICATIONS

- NPTEL Elite – Human Computer Interaction (HCI)
- NPTEL Elite – Design and Implementation of Human–Computer Interfaces
- NPTEL – Privacy and Security in Online Social Media

HACKATHONS & ACHIEVEMENTS

- **VIHANSA 2K26:** Participated in a 24-hour national-level hackathon, developing a Sentiment Analysis project using NLP.

WORKSHOPS

- Completed a 10-Day Cyber Security Workshop covering Linux, VirtualBox, and ethical hacking fundamentals.
- Participated in a National-Level Workshop on Data Analytics using Statistical Tools at Karpagam College of Engineering.

CO-CURRICULAR ACTIVITIES

- Participated in national-level hackathons, working on AI and NLP-based project development.
- Presented a research paper at ICRIT '26 on an Integrated Cooperative Farming System with Farmer Connectivity and Crop Recommendation.
- Attended technical workshops in Cyber Security and Data Analytics.
